Management Information

Provide a project plan showing team member responsibilities, work arrangements and any information team members will be using to coordinate their activities. You should also mention any software tools used by the team to assist project management.

The entire project will be appropriately distributed among each team member and it will be their responsibility to oversee its completion. To assist this process, our group will make use of projects and issues, so that each deliverable and their requirements can be managed which can be seen in Figure 4.1 & Figure 4.2.

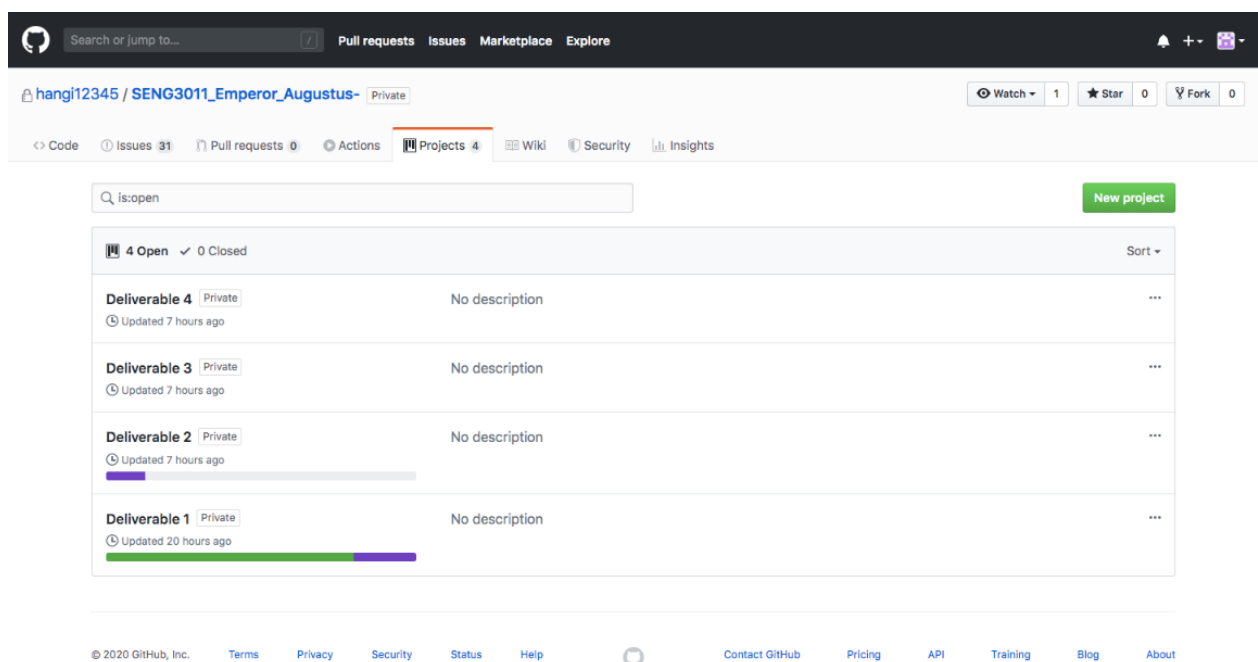

Figure 4.1: Github's Projects used to replicate Deliverables

Figure 4.2: Github's Issues used to replicated requirements

Despite the weekly mentor meetings, our group will actively update everyone on their individual progress and will aim to fully meet the requirements of a deliverable 1-2 days before it is due. Hence each deliverable and their requirements have been mapped out in the GANTT chart in Figure 4.3.

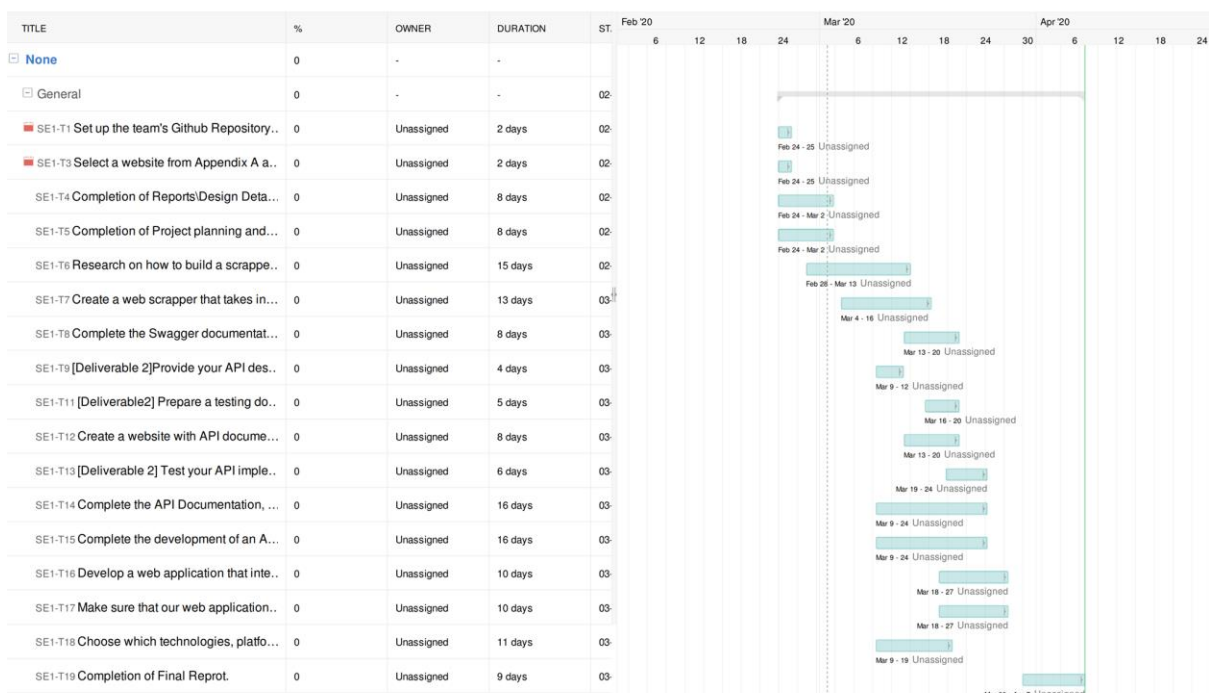

Figure 4.3: GANTT Chart

Currently the responsibilities of each team member are as follows:

Richard: Report, API, Firebase management

Gus: Scraper, Firebase management, Testing

Jack: Frontend Website, API, Swagger Documentation

Niki: Report, Frontend Website, Scraper

Paul: Scraper, Firebase management, Testing

Patrick: Frontend Website, Report, Testing
